0:00-0:05	Meet Deli, the new AI-powered assistant that finds your clients dream home in seconds.	Friendly animation of the Deli logo with a welcoming chime
0:05-0:15	You can give Deli this:	<i>Text on Screen: "Homes, under \$650,000 in the 32205 area code that has at least 2 bedrooms with walk-in showers, granite countertops, and a large backyard for the dog."</i>
0:15-0:25	So you can do less of that:	Realtor searching messy MLS sites with lots of tabs open, tons of listing pages, showing the checkboxes,
0:25-0:35	And do more of this	Realtor relaxing, their phone goes off, text message pop up from a new lead.
0:35-0:45	Use Deli to find properties quickly, like this:	Close-up of realtor typing on the laptop, showing the Deli chatbot interface. The screen shows Deli quickly generating a list that match the detailed search
0:45-0:55	Instead of wasting time on traditional searches like that:	Realtor manually scrolling through numerous MLS listings, checking & unchecking the multiple box filters and trying to specify things like large backyard, etc. The realtor looks stressed
0:55-0:65	Share properties effortlessly like this:	Realtor selecting properties on Deli and sending them to clients with a simple button click. Split screen. Clients receive the listings instantly on their devices.
0:65-0:75	Rather than struggling to keep track of client preferences like that:	Realtor surrounded by sticky notes and paper files, digital spreadsheets, emails with preferences, etc.
0:75-0:85	Keep your workflow smooth and efficient like this:	Realtor using Deli on a phone at a coffee shop, showing the platforms versatility and being able to use it on the go. Split face or paste the client dashboard of Deli on the screen to highlight the access of preferences.
